

[FSAC Notes](#) | [Presentation](#) | **November 13, 2025**

Project 386 Web Content Management Service Migration from Drupal to WordPress

Presented By: Sheila Modesitt (for Lacey Vickery)

Key Points:

- On-demand training is available through [Canvas](#).
- Personalized departmental training is available upon request to Web Services.
- Help documentation is available on the [OneIT Knowledge Base](#).
- For technical help, please [submit a help ticket](#).

Project 651 Banner Audit

Presented by: Jade Mendonça

Key Points:

- Thank you to all who used the new audit tool in the October Finance pilot, and especially to those who completed the user survey.
- Comments and suggestions are being collated for use in the Spring audit release.

Project 662 Simplex Fire Alarm System

Presented by: Stan Gant

Key Points:

- Project will replace the alarm system network in phases, one loop at a time.
- Q: Is it common that these networks need updating? A: No; this is the first time in decades.
- Q: Will there be changes to alarm system testing or fire drills? A: No changes are expected.

AI Training

Presented by: Beth Rugg

Key Points:

- Common campus tools are Microsoft Copilot and Google Gemini - they are available to everyone!
- The intent is to help people free up time by using AI tools.
- AI [training](#) of various types and durations is offered; individual departments & teams can [request training](#) as well.

Portfolio Updates

- OneIT and University leadership are reviewing the requests and recommendations from the Fall 2025 refresh.
- Anticipate that the Spring Call will open shortly after winter break.

We are always looking for feedback!

Please email us at oneit-ppmo-group@charlotte.edu
your thoughts and ideas on the following:

- *What Projects are of interest to you?*
- *What Portfolio metrics would you like to see?*

Detailed updates on the above and more can be found in the [FSAC Meeting Notes](#).

For project information, click on the project row in the [Track a Request or Project](#) sheet. More details can be found in the panel on the right side. Use a filter, if needed, to narrow down the list of projects displayed.

Reminders:

The [System Status](#) page in the customer service portal details upcoming changes, maintenance efforts, outages and known issues.

Note regarding Smartsheet: Users should add all of their [@charlotte.edu](#) email and [@uncc.edu](#) email addresses as alternatives in Smartsheet. [Learn how to](#)

[access the portal and add additional email addresses](#). If you have any questions feel free to email oneit-ppmo-group@charlotte.edu.

Please share these notes with your colleagues.
See you at the next meeting in **January 2026** (*specific date pending*).
Meetings will continue to be virtual.
